Changelog for Tengwar Annatar 1.20

Changes since version 1.10:

(Note: This log is by no means complete.)

A completely new font family, Tengwar Annatar Alt, has been added.

The encoding has changed at some points.

The following characters are added:

(At least) the following characters have been changed in some way or another:

The kerning has been further refined.

By popular demand, the ascent of the italic telcor has been increased:

$$\beta > \beta$$

Some ligatures found in the ring inscription have been included:
